To Our Visitors:

Welcome to the Third Biennial Conference of the American Society of Health Economists. We very much hope that you enjoy the conference and that you are made to feel welcome by our community (academic and social) and by our state.

As the conference's host organizing committee, we have been hard at work to prepare a schedule of activities which we hope will make this an exciting and worthwhile experience for everyone.

If during your visit there is something we can do to help make your stay better, please do not hesitate to contact one of us or one of the student helpers or staff who will be stationed around the conference venues.

We hope that you enjoy your time here in Ithaca and that you have an opportunity to experience everything that the Finger Lakes region and Upstate New York have to offer.

Host Organizing Committee

I would like to welcome each of you to the Third Biennial Conference of ASHEcon, hosted by Cornell University and co-hosted by Syracuse University and the University of Rochester. The mission of ASHE has been to promote excellence in health economics research and to provide a forum for emerging ideas and empirical results of health economics research. The biennial conferences are the primary activity through which we hope to achieve this mission.

The First and Second Biennial conferences were great successes. We hope that this conference lives up to the reputation that has been established. This year we have more than 600 papers being presented and over 125 posters displayed, which represents continued growth in the size and breadth of the conference. Following the model established at the Second Biennial Conference, there will be two plenary sessions, one on Sunday evening, featuring Kip Viscusi, and the other on Tuesday evening, featuring Sherry Glied. Michael Grossman will present the presidential address during the noon hour on Monday and the ASHEcon Business meeting will be during the noon hour on Tuesday. The Victor Fuchs Lifetime Achievement Award, the ASHEcon Medal and the Student Paper Award will be presented at the Tuesday afternoon plenary.

We place high value on the over 750 attendees having significant time for interaction with other health economists through the sessions, coffee breaks, shared meals and receptions. The venue at Cornell provides more challenges than were confronted at previous ASHEcon conferences, but we have tried to make it very workable and convenient. The Cornell location provides beautiful scenery and where else could we find a major university with a gorge running through it.

Once again the ASHEcon goal of inclusion is being met. Those participating in the conference range from senior health economists to students, and come from academe, government and industry. I believe the planning committee has been successful in efforts to provide sessions and workshops on a broad range of topics. Everyone should be able to find topics that are of interest to them.

A conference of this size and quality would not be possible without the support of many people. Special thanks go to the Planning Committee chaired by President Elect Randy Ellis, the Local Organizing Committee Chaired by Will White, and ably supported by Debbie Freund; the entire staff of Cornell University; the sponsors of this conference listed in this program and to the city of Ithaca for the support they have provided to this conference. Many people provided very valuable behind the scene assistance but most notably Diana Brinkman, Events Manager for the College of Human Ecology. I owe much gratitude to ASHEcon President Mike Grossman, President Elect Randy Ellis, the officers, board and staff of ASHEcon for many hours of service devoted to planning this conference and the operation of ASHEcon. Finally, we owe much to Tom Getzen and the staff of iHEA, under whose wing we operate until the end of this year.

We hope this conference achieves all of your expectations. Please fill out the online evaluation survey to assist us in planning of future conferences.

Regards,
Richard J. Arnould
Executive Director, ASHEcon

ASHEcon Award Information

ASHEcon Medal

Description: The ASHEcon Medal is awarded biennially to the economist age 40 or under who has made the most significant contributions to the field of health economics.

Eligibility: Applicants must be age 40 or younger on January 1 of the year of the ASHEcon conference. Applicants must hold their primary appointment in an American institution, but need not be citizens of the United States. As a condition of receiving this honor, the recipient must attend the ASHEcon conference.

Criteria: The criteria are scholarly contributions to health economics, primarily through publications in economics journals. Contributions may be theoretical, empirical, or methodological.

Victor R. Fuchs Award for Lifetime Contributions to the Field of Health Economics

Description: The Victor R. Fuchs Award for Lifetime Contributions to the Field of Health Economics is awarded biennially to an economist who has made significant lifetime contributions to the field of health economics.

Eligibility: Applicants must hold their primary appointment (or be emeritus or retired) at an institution based in the United States, but need not be United States citizens. As a condition of receiving this honor, the recipient must attend the ASHEcon conference.

Criteria: The criteria are scholarly contributions to health economics, primarily through publications in economics journals. Contributions may be theoretical, empirical, or methodological.

Student Paper Award

Description: The ASHEcon Student Paper Award honors the student who wrote the best sole-authored paper.

Eligibility: Applicants must be current Ph.D. students or have received their Ph.D. from an American institution. The paper must be sole authored. The paper may be published (or forthcoming) in a peer-reviewed journal. As a condition of receiving this honor, the recipient must attend the ASHEcon conference.

Criteria: The Awards Committee will select the paper that makes the greatest contribution to health economics. The paper's contributions may be theoretical, empirical, or methodological.

Powerful

It's not just a word, it's the strength of the data.

Millions of discharges, thousands of hospitals, and dozens of clinical and non-clinical data elements make the Healthcare Cost and Utilization Project (HCUP) a powerful resource. Sponsored by the U.S. Agency for Healthcare Research and Quality, HCUP is a family of health care databases, software tools, and products for advancing research. As the largest collection of multi-year, all-payer, health care data available to researchers, HCUP provides the tools for cutting-edge health care research and policy analyses that can make a difference in the Nation's health care. Rely on the power of HCUP to help answer your most important questions.

Powerful Data. Meaningful Answers. Learn more at www.hcup-us.ahrq.gov.

Rediscover your go

with VISIONAIRE[®] Patient Matched Technology

Rediscover the life you had before knee pain

VISIONAIRE Patient Matched Instrumentation for knee replacement surgery may be the next step toward rediscovering your active life.

By using instruments specifically designed from your MRI and X-Ray, your surgeon can accommodate the unique shapes and angles of your knee while aligning the implant. This tailor-made procedure will help your implant achieve its peak performance.

Knee replacement surgery is intended to relieve knee pain and improve knee function. There are potential risks with knee replacement surgery such as loosening, fracture, dislocation, wear and infection. Recovery takes time and depends on factors like activity level, weight and age. Ask your doctor which implant and instrumentation is right for you.

Workers Compensation Research Institute

*Where Research Is a
Catalyst for
Constructive Change*

WWW.WCRINET.ORG
WCRI@WCRINET.ORG

- The nation's leading independent public policy research organization specializing in workers' compensation programs.
- Workers' compensation systems are public programs that annually provide about \$80 billion in medical care and income benefits to nearly 4 million injured workers.
- The Institute's work helps those interested in improving workers' compensation systems by providing innovative and objective analyses that are published after a rigorous external peer review.

Current Health Policy Research Agenda:

- How does medical price regulation affect care and patient outcomes?
- What explains the large variation in the nature of medical care?
- Does physician ownership of facilities affect utilization and costs?
- How do evidence-based guidelines affect care, cost, and patient outcomes?
- How does prospective utilization review affect care, cost, and outcomes?
- Do pharmacy benefit managers affect the use of narcotics?

Employment and Fellowship Opportunities

DIRECTOR OF RESEARCH

This position leads the multi-disciplinary research staff of 13 with advanced degrees in economics, public policy, statistics, and law. The Director of Research is the chief scientist and chief quality officer. S/he also partners with program managers to develop the annual research agenda, leads challenging research projects and assists in dissemination of study findings to public officials and the public.

SENIOR HEALTH ECONOMIST or PUBLIC POLICY RESEARCHER

WCRI has several openings for health economists and public policy analysts at the M.A. and Ph.D. levels. WCRI researchers have access to a unique database that includes over 30 million episodes of disability, and patient outcomes data from nearly 14,000 interviews. WCRI researchers publish in the WCRI peer-reviewed monograph series, and may also publish in academic journals.

JOHN JONES SCHOLAR

The John Jones Scholar in Workers' Compensation Research provides young scholars with an opportunity to explore this rapidly expanding field of research.

- Past recipients include junior faculty or Ph.D. candidates at Berkeley, Maryland, Mass. General Hospital, and Stanford.
- Jones Scholars receive a grant of \$10,000 to be used for new research projects, dissertation support, or as a Scholar-in-Residence at WCRI offices in Cambridge, MA.

Professor of Health Economics (Two positions)

**Centre for Health Economics,
Faculty of Business and Economics**

Monash University, Melbourne, Australia

The University

Monash University has a bold vision – to deliver significant improvements to the human condition. Distinguished by its international perspective, Monash takes pride in its commitment to innovative research and high quality teaching and learning.

The Opportunity

The University is seeking two outstanding appointees to provide strategic and research leadership in the Centre for Health Economics. The centre's large group of applied economists undertake internationally recognised research in health economics and econometrics, funded almost exclusively from nationally competitive grants and contract research income.

The successful candidates will have an international reputation for excellent research, a strong record of obtaining external research grants, highly developed leadership, management and networking skills and a vision for the future of health economics in Australia and internationally.

The Benefits

A competitive remuneration package will be negotiable for outstanding candidates. Relocation travel, removal allowance and salary packaging are available.

Monash offers a range of professional development programs, support for research, study and overseas work, generous maternity leave and flexible work arrangements.

Duration

The appointments will be for a fixed term of five years. Subject to performance and other criteria, a further term may be negotiable.

Location

Clayton campus
